

SUSANTH KURMA

Data Analyst | Business Intelligence | Dataiku Developer

Email: susanthkurma3@gmail.com | Phone: +91 9948333291

LinkedIn: <https://linkedin.com/in/susanth-kurma> | Location: Hyderabad, India

PROFESSIONAL SUMMARY

Data Analyst with 5 years of experience delivering data-driven insights across Healthcare and Supply Chain domains. Expertise in SQL, Python, Power BI, and Data Modeling to analyze large-scale datasets and build impactful analytics solutions. Proven ability to design scalable ETL pipelines, develop KPI frameworks, and create executive dashboards that improve operational efficiency and support strategic decision-making. Experienced in pipeline automation, statistical analysis, trend detection, and stakeholder collaboration to translate complex business questions into actionable insights.

TECHNICAL SKILLS

Power BI	Power Query	Data Modeling	DAX
Row-Level Security	Power BI Services (Fabric)	Dashboard Design	Tableau
MySQL	Oracle	SQL	AWS Redshift
Python	NumPy	Pandas	Exploratory Data Analysis
Data Validation	Data Warehousing	Data Profiling	KPI Design
Trend Analysis	Dataiku	Data Migration	Workflow Scheduling
Advanced Excel	Pivot Tables	Charts	PowerPoint
Azure DevOps	Rally	AWS	SDLC

PROFESSIONAL EXPERIENCE

Supply Chain Analyst

Microsoft – Blizpath Innovations | April 2026 – Present | Bengaluru - Remote

- Supporting demand planning and capacity execution for Azure infrastructure by contributing to forecasting and iteration planning for about 5000 capacity cycles, improving planning visibility and delivery alignment.
- Developing and maintaining planning dashboards and executive reports tracking 10+ key capacity and compliance metrics, enabling faster and data-driven decision-making.
- Collaborating with cross-functional teams (engineering, planning, operations) to help resolve 5+ demand blockers per cycle, ensuring smoother supply chain execution.
- Contributing to governance and compliance processes by monitoring planning signals and supporting 100% adherence to operational standards and execution timelines.

Tools: SQL, Python, Power BI, Excel.

Data Analyst

United Health Group – TCS | July 2023 – April 2026 | Hyderabad

- Refined healthcare operational KPIs by 18–20% by analyzing 5 million claim records using advanced SQL, Amazon Redshift, and automated analytics pipelines.
- Optimized SQL queries in Amazon Redshift (joins, aggregations, subqueries, performance tuning) to extract and transform high-volume datasets for analytics use cases.
- Built scalable ETL pipelines in Dataiku integrating multiple data sources, reducing manual reporting effort by 60% and enabling near real-time reporting.
- Performed trend and variance analysis on readmission rates and wait-time metrics, identifying bottlenecks and contributing to a 12% reduction in operational delays.

- Partnered with business stakeholders to define measurable KPIs and translate business requirements into analytical solutions.

Tools: SQL, Amazon Redshift, Dataiku, Power BI, Python, Git, AWS, Rally.

Power BI Developer

PepsiCo – TCS | Apr 2021 – July 2023 | Hyderabad

- Analyzed supply chain data from 5 countries (UK, Germany, Netherlands, France, Belgium) to optimize stock accuracy and vendor performance.
- Monitored inventory movement and aging trends using SQL to identify slow-moving stock and reduce excess inventory by 15%.
- Implemented SQL-based data extraction frameworks from Oracle inventory systems to support warehouse-level and SKU-level performance analysis across 5+ regions and 20K+ SKUs.
- Interactive Power BI dashboards tracking inventory aging, turnover, and stock coverage, helping supply chain teams reduce stock-out incidents by 18% and improve inventory visibility by 35%.
- Time-based automation was implemented for daily and monthly inventory reporting pipelines, reducing manual effort by 60% and improving reporting reliability.
- Configured Row-Level Security and scalable data models to support region-based performance tracking.

Tools: SQL, Oracle, Power BI (DAX, Power Query), Advanced Excel, Data Modeling, Row-Level Security, Azure DevOps.

PROJECTS

Healthcare Operational Analytics | SQL, Power BI, Python

- Assessed claims and patient admission data using advanced SQL (window functions, cohort analysis) to evaluate readmission rates and provider performance.
- Delivered KPI monitoring framework for ALOS, utilization, and claim turnaround metrics.
- Identified workflow bottlenecks, reducing operational delays by 12% and improving provider utilization by 15%.

Inventory Performance Optimization | SQL, Power BI

- Enhanced SKU-level inventory analytics model using SQL (CTEs, window functions, rolling demand analysis) to identify slow-moving and excess stock.
- Designed interactive Power BI dashboards to monitor inventory aging, turnover, and stock coverage across supply chain operations.
- Reduced excess inventory by 15% and improved turnover efficiency through data-driven redistribution strategies.

EDUCATION

Master of Computer Applications (MCA)

V R Siddhartha College of Engineering, JNTU Kakinada | 2017 – 2020

CERTIFICATIONS

Internship at ESSO-INCOIS

Indian National Centre for Ocean Information Services | Nov 2019 – Apr 2020

Microsoft Power BI Desktop for Business Intelligence

Udemy

DP-100: Azure Data Scientist Associate

Microsoft
